Risk Chart

Risk is inherent in all investing. Investing in a mutual fund – even the most conservative – involves risk, including the risk that you may receive little or no return on your investment or even that you may lose some or all of the money you invested.

Performance as of September 30, 2009

State Farm International Equity Fund - Average Annual Total Returns

*A theoretical investment in an index does not reflect any expenses. It is not possible to invest directly in an index.

This performance data represents past performance and does not guarantee future results. There is no guarantee that the circumstances leading to this performance will be replicated in the future. Investment return and principal value will fluctuate and fund shares, when redeemed, may be worth less than their original cost. Year-to-date and since inception total return are the compounded rate of change in value during a period of investment, including the value of shares acquired through reinvestment of all dividends and of all capital gain distributions for the period. These figures are based on an investment at the beginning of the period through the end of the period and reflect all applicable fees and expenses. These figures do not reflect taxation a shareholder would pay upon a distribution or redemption from a qualified retirement plan. **Recent performance may be less than the figures shown.** Obtain total returns current to the most recent month-end at statefarm.com[®] under the Mutual Funds tab for Class R-1, R-2, and R-3 shares.

Net Asset Value (NAV) is calculated by adding all of the assets of a fund, subtracting the fund's liabilities, then dividing by the number of outstanding shares. A separate NAV is calculated for each class of each fund. NAV is calculated at the close of each business day.

¹ State Farm Investment Management Corp., the investment advisor for each fund, has voluntarily agreed to reimburse each fund for certain annual operating expenses. This agreement may be eliminated at any time.

² For the time period prior to September 13, 2004, the performance data quoted in this report for State Farm Class R-1, R-2, and R-3 shares is the performance for the Legacy Class A shares adjusted for annual expenses associated with Class R-1, R-2, and R-3 shares. Class R-1, R-2, and R-3 shares are comprised of the same underlying securities portfolio and have the same investment objectives as Legacy Class A shares. Class R-1, R-2, and R-3 shares have an inception date of September 13, 2004. Legacy Class A shares have an inception date of December 18, 2000, except for the LifePath[®] Funds, which have an inception date of May 9, 2003.

³ The MSCI All Country World Index (ACWI) (ex-US) is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global developed and emerging markets excluding the US.

LifePath[®] Funds are registered trademarks of Barclays Global Investors, N.A.

Class R-1, R-2, and R-3 shares may only be purchased for certain qualified retirement plans as set forth in the prospectus. There is no assurance that the fund will achieve its investment objective. An investment should be made with an understanding of the risks that an investment in equity securities entails. These include the risk that the financial condition of the issuers of the securities in the portfolio, or the condition of the stock market in general, may decline. Fund shares, when redeemed, may be worth more or less than their original cost. The fund invests its assets primarily in common stocks of foreign companies. Investing in foreign securities involves risks not normally associated with investing in the U.S., including higher trading and custody costs, less stringent accounting, legal, and reporting practices, potential for political and economic instabilities, and the fluctuation and potential regulation of currency exchange and exchange rates. Investments in emerging markets securities include special risks in addition to those generally associated with foreign investing. Many investments in emerging markets can be considered speculative, and the value of those investments can be more volatile than in more developed foreign markets. Expropriation, confiscatory taxation, nationalization, political, economic and social instability have occurred throughout the history of certain emerging market countries and could adversely affect Fund assets should any of those conditions recur. The securities of smaller capitalization companies are often more difficult to value or dispose of and obtain information about, and are more volatile than stocks of larger, more established companies, and may not be actively traded, increasing the risk that there may be difficulty selling the securities the fund holds.

State Farm Mutual Funds are available through prospectus by registered representatives of State Farm VP Management Corp., One State Farm Plaza, Bloomington, Illinois 61710, 1-800-447-4930. Please read the prospectus and consider the investment objectives, risks, charges and expenses and other information it contains about State Farm Mutual Funds carefully before investing.
