

State Farm® International Index Fund

as of September 30, 2009

Class R-1, R-2, and R-3 Shares

State Farm Mutual Fund Trust

Investment Objective

Seeks to match the performance of an international portfolio of common stocks represented by the Morgan Stanley Capital International Europe, Australasia, and Far East Free Index ("EAFE® Free Index").

Investment Strategy

The International Index Fund invests all of its assets in the International Index Master Investment Portfolio. The International Index Master Portfolio and the International Index Fund have substantially similar investment objectives. The International Index Master Investment Portfolio attempts to remain as fully invested as practicable in a pool of stocks and other equity securities that are found in the EAFE Free Index. Under normal operating conditions, the International Index Master Investment Portfolio seeks to invest at least 90% of its total assets in stocks that are represented in the EAFE Free Index.

The EAFE® Free Index is a trademark, service mark and the exclusive property of Morgan Stanley Capital International, Inc. ("MSCI") and its affiliates and has been licensed for use by the State Farm Mutual Fund Trust (the "Trust"). The State Farm International Index Fund (the "Fund"), based on the EAFE® Free Index, has not been passed on by MSCI as to its legality or suitability, and is not issued, sponsored, endorsed, sold or promoted by MSCI. MSCI makes no warranties and bears no liability with respect to the Fund. MSCI has no responsibility for and does not participate in the management of the Fund assets or sale of the Fund shares.

*A theoretical investment in an index does not reflect any expenses. It is not possible to invest directly in an index.

This performance data represents past performance and does not guarantee future results. There is no guarantee that the circumstances leading to this performance will be replicated in the future. Investment return and principal value will fluctuate and fund shares, when redeemed, may be worth less than their original cost. Year-to-date and since inception total return are the compounded rate of change in value during a period of investment, including the value of shares acquired through reinvestment of all dividends and of all capital gain distributions for the period. These figures are based on an investment at the beginning of the period through the end of the period and reflect all applicable fees and expenses. These figures do not reflect taxation a shareholder would pay upon a distribution or redemption from a qualified retirement plan. **Recent performance may be less than the figures shown.** Obtain total returns current to the most recent month-end at statefarm.com[®] under the Mutual Funds tab for Class R-1, R-2, and R-3 shares.

Net Asset Value (NAV) is calculated by adding all of the assets of a fund, subtracting the fund's liabilities, then dividing by the number of outstanding shares. A separate NAV is calculated for each class of each fund. NAV is calculated at the close of each business day.

¹ State Farm Investment Management Corp., the investment advisor for each fund, has voluntarily agreed to reimburse each fund for certain annual operating expenses. This agreement may be eliminated at any time.

² For the time period prior to September 13, 2004, the performance data quoted in this report for State Farm Class R-1, R-2, and R-3 shares is the performance for the Legacy Class A shares adjusted for annual expenses associated with Class R-1, R-2, and R-3 shares. Class R-1, R-2, and R-3 shares are comprised of the same underlying securities portfolio and have the same investment objectives as Legacy Class A shares. Class R-1, R-2, and R-3 shares have an inception date of September 13, 2004. Legacy Class A shares have an inception date of December 18, 2000, except for the LifePath[®] Funds, which have an inception date of May 9, 2003.

³ The Morgan Stanley Capital International Europe, Australasia and Far East Free (EAFE[®] Free) Index currently measures the performance of stock markets of Europe, Australia, New Zealand, and the Far East and takes into account local market restrictions on share ownership by foreigners. EAFE Free is meant to reflect actual opportunities for foreign investors in a local market. Returns are measured in U.S. dollars. Unlike an investment in the International Equity Fund, a theoretical investment in the Index does not reflect any expenses. It is not possible to invest directly in an index.

LifePath[®] Funds are registered trademarks of Barclays Global Investors, N.A.

Class R-1, R-2, and R-3 shares may only be purchased for certain qualified retirement plans as set forth in the prospectus. There is no assurance that the fund will achieve its investment objective. An investment should be made with an understanding of the risks that an investment in equity securities entails. These include the risk that the financial condition of the issuers of the securities in the portfolio, or the condition of the stock market in general, may decline. Fund shares, when redeemed, may be worth more or less than their original cost. The International Index Master Investment Portfolio invests its assets primarily in common stocks of foreign companies. Investing in foreign securities involves risks not normally associated with investing in the U.S. including higher trading and custody costs, less stringent accounting, legal, and reporting practices, potential for political and economic instabilities, and the fluctuation and potential regulation of currency exchange and exchange rates. The fund seeks to match the performance of an index. There is no guarantee that it will be able to do so. The fund intends to remain fully invested in the International Index Master Investment Portfolio even at times of falling market prices. It is not possible to invest directly in an index.
