

State Farm® Small-Mid Cap Equity Fund

as of December 31, 2009

Class R-1, R-2, and R-3 Shares

State Farm Mutual Fund Trust

Investment Objective

Seeks long-term growth of capital.

Investment Strategy

The fund invests primarily in equity securities of small- and mid-capitalization U.S. companies. The fund employs a multi-manager approach, and fund assets will generally be invested in a mixture of securities exhibiting "Value" and "Growth" investment characteristics. "Value" is defined as those securities priced cheaply relative to some financial measure of worth such as the ratio of price to earnings. "Growth" is defined as those securities likely to demonstrate superior earnings growth relative to their peers and are likely to be selling at attractive relative valuations.

Who May Want to Invest?

Those seeking long-term growth.

This performance data represents past performance and does not guarantee future results. There is no guarantee that the circumstances leading to this performance will be replicated in the future. Investment return and principal value will fluctuate and fund shares, when redeemed, may be worth less than their original cost. Year-to-date and since inception total return are the compounded rate of change in value during a period of investment, including the value of shares acquired through reinvestment of all dividends and of all capital gain distributions for the period. These figures are based on an investment at the beginning of the period through the end of the period and reflect all applicable fees and expenses. These figures do not reflect taxation a shareholder would pay upon a distribution or redemption from a qualified retirement plan. **Recent performance may be less than the figures shown.** Obtain total returns current to the most recent month-end at statefarm.com® under the Mutual Funds tab for Class R-1, R-2, and R-3 shares.

Net Asset Value (NAV) is calculated by adding all of the assets of a fund, subtracting the fund's liabilities, then dividing by the number of outstanding shares. A separate NAV is calculated for each class of each fund. NAV is calculated at the close of each business day.

¹ State Farm Investment Management Corp., the investment advisor for each fund, has voluntarily agreed to reimburse each fund for certain annual operating expenses. This agreement may be eliminated at any time.

² For the time period prior to September 13, 2004, the performance data quoted in this report for State Farm Class R-1, R-2, and R-3 shares is the performance for the Legacy Class A shares adjusted for annual expenses associated with Class R-1, R-2, and R-3 shares. Class R-1, R-2, and R-3 shares are comprised of the same underlying securities portfolio and have the same investment objectives as Legacy Class A shares. Class R-1, R-2, and R-3 shares have an inception date of September 13, 2004. Legacy Class A shares have an inception date of December 18, 2000, except for the LifePath® Funds, which have an inception date of May 9, 2003.

³ The Russell 2500® Index tracks the common stock performance of the 2,500 smallest U.S. companies in the Russell 3000® Index, which represents approximately 17% of the total capitalization of the Russell 3000 Index. Unlike an investment in the Small/Mid Cap Equity Fund, a theoretical investment in the Index does not reflect any expenses. It is not possible to invest directly in an index.

Class R-1, R-2, and R-3 shares may only be purchased for certain qualified retirement plans as set forth in the prospectus. There is no assurance that the fund will achieve its investment objective. An investment should be made with an understanding of the risks that an investment in equity securities entails. These include the risk that the financial condition of the issuers of the securities in the portfolio, or the condition of the stock market in general, may decline. Fund shares, when redeemed, may be worth more or less than their original cost. This fund invests a large portion of its assets in smaller capitalization companies. The securities of these companies are often more difficult to value or dispose of and obtain information about, and are more volatile than stocks of larger, more established companies, and may not be actively traded, increasing the risk that there may be difficulty selling the securities the fund holds. Investing in foreign securities involves risks not normally associated with investing in the U.S., including higher trading and custody costs, less stringent accounting, legal, and reporting practices potential for political and economic instabilities, and the fluctuation and potential regulation of currency exchange and exchange rates.
